Vermont Marble Balance Tables Use AirLoc Pads for Vibration Isolation!

Gawet Marble & Granite of Center Rutland Vermont utilize the unique stability and damping properties of AirLoc isolation pads along with the beneficial properties of Danby Vermont Marble to produce their famous Balance Tables. AirLoc pads located between the top marble slab and legs help eliminate vibration and shock inputs for the clear reading and operation of analytical instruments, and precision laboratory equipment. AirLoc supplies Gawet with pads cut to size for easy installation and consistent performance.
